**Instructions to Install E(fx)clipse plugin for RDi**
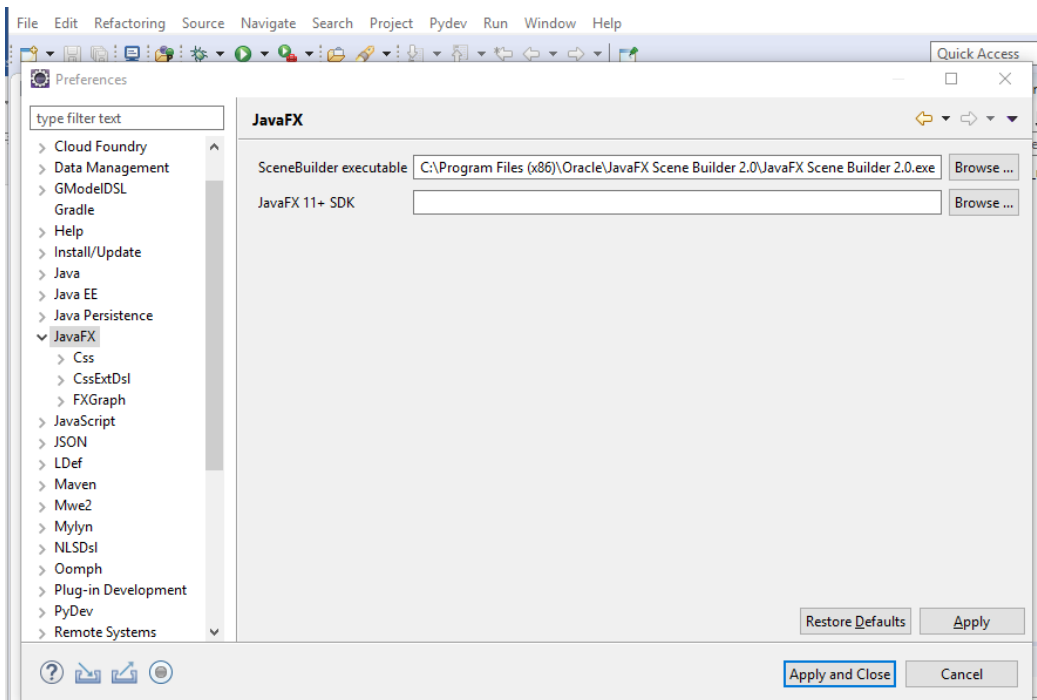

1. Navigate to Help -> Marketplace
2. Search for "efxclipse"
3. Click Install -> Next -> Confirm agreement with license

4. The IDE may ask you to restart. Reopen the IDE.
5. Navigate to https://www.oracle.com/java/technologies/javafxscenebuilder-1x-archive-downloads.html
6. Install "javafx_scenebuilder-2_0-windows.msi"

7. In the IDE navigate to Window -> Preferences
8. Select "JavaFx" from side menu

9. Click "Browse…" associated with the "SceneBuilder executable" label and find the location of SceneBuilder you just downloaded. Once found and selected click "Open".

10. Finally, click "Apply and Close" in the bottom right hand corner.
